Anthological Biographer Edward Paul Donegan

An anthology is like a “best-of” collection chosen around a theme, author, or time period. Key idea: An anthology = a curated collection of works, often by different creators, grouped together for a purpose or theme.

I am a writer supporting an alternative history view far into the Kennedy assassination and the history of it. The group of works that I am anthologizing is the biographies of Cold War generation covert operatives of MK-Ultra. Like my family and with my autobiography it deals with the realities JFK and RFK faced - As Roman Catholic Irish immigrants to Boston, Massachusetts they had a resentment of England, of the East India Company, United Fruit Company (The United Fruit Company is one of the main reasons the term “banana republic” became famous. A banana republic is a country that is formally independent but, in practice, is heavily shaped by foreign business interests, corrupt elites, and weak institutions. The phrase was originally used for parts of Central America and the Caribbean where foreign fruit companies had outsized power.), and others that colonized independent nations and held them under often undemocratic rule, strong-men rulers, etc.,

> Chat GPT: Yes. You’re referring to W. Averell Harriman.
>
> Brown Brothers Harriman is tied to him in a direct historical way: W. A. Harriman & Co. began as the financial arm of Averell Harriman’s shipping business, and that firm later became part of Brown Brothers Harriman through the 1931 merger that formed BBH.
>
> That link matters for global trade because Harriman’s early business empire was built around shipping, merchant vessels, and international transport, which connected finance to cross-border commerce. In other words, BBH’s Harriman side grew out of the infrastructure of world trade, not just domestic banking.
>
> It also matters for global relations because Averell Harriman later became a major U.S. diplomat and statesman. He served as a leading American envoy in World War II and the Cold War, including work involving relations with the Soviet Union and major postwar international policy.
>
> So the short connection is: shipping and finance led to BBH; diplomacy and statecraft linked the Harriman name to international relations. BBH sits at that intersection of private finance, global trade networks, and elite foreign-policy influence.

> There's also a deeper historical layer: BBH traces part of its origins to the Brown family's transatlantic mercantile network, including cotton trade routes tied to the 19th-century Atlantic economy, as discussed in this Guardian report.
>
> If you want, I can turn this into a cleaner 1-paragraph summary or a timeline.

Profiles in Courage was a John F. Kennedy book with a forward from Robert F. Kennedy on later in speeches used in reference to British members of Parliament who stood against repressive tactics in colonies though those tactics were popular with the British people scooping up much of the world's wealth into the Great Britain world-wide. The connection to anti-colonialism is more indirect but still important. A year after the book won the Pulitzer, Kennedy gave his 1957 Senate speech often called "*Imperialism: the Enemy of Freedom,,*" arguing that the United States should support independence movements in Africa and Asia and **criticizing Western colonial rule**, especially in Algeria. Source.

My research and my family histories and the biographies of the Cold War I is derivative from and similart to *The Devil's Chessboard* by David Talbot in that I go into the 1950' presidential histories and John Foster Dulles and Allen Dulles in the 1950's conspiring with Richard Nixon and the plans I write about were formed in those years. Many other conduct important research in to the JFK presidency and the Warren Commission years where Allen Dulles and James Jesus Angleton remain as important figures in the cover-up. I also go into geneology and hidden identities. Many lived under or used fictitious names and even as children born to parents from the underground railroad away from 1920' Nazim or other wars lived in the US with new or adoptive names. Some of these families including my own will continue importance as the OSS, CIA, and Vatican work openly and covertly with other churches and other nations druing these years. For Gladio context I draw upon *Gladio: The Unholy Alliance Between the Vatican, the CIA, and the Mafia* by Paul L. Williams.

Gladio in its various form meant more than just Project Paperclip and other programs bring background cleared Nazi scientists or espionage experts (Ghelen) to the USA after WW 2 it also was the Vatican and others in 1926 overt and covert railroads as Nazism rose before it becaem too late to escape.

❖ Biographies including my own

- "
- ➜ **Col Fletcher Prouty:** Widely ignored or edited-down by those who write about the John F. Kennedy and RFK and Martin Luther King assassinations Col Prouty asserted power allegiances inside the USA were to Great Britian and other nations, and included in MK-

Ultra operations was the overthrow of Indonesia by backing Suharto over Sukarno in the post WW-2 Cold War years as the US, China, and the USSR competed to control the world map.

- ➞ **Sam Giancana:** The Giancana family has published Double Cross. The subject of the book is that Nixon as V.P. had numerous active deals with the Outfit from Chicago that Giancana led to help with dirty tricks around the world and this mafia committed many murders and silence many leakers of what the CIA was really doing inside and outside the USA. The Double Cross was that Senator John F. Kennedy played along for a while but as soon as he was sworn in on that day or the day after he appointed his brother Robert F. Kennedy to shut down the mafia and Nixon's use of it against unions once and for all.
- ➞ **Marilyn Monroe:** Born in 1926 in the USA in and with help from Joseph Kennedy Sr. this Roman Catholic sex-pot actress was in fact used to seduce Suharto, and was close to all of the CIA activities that JFK was in part behind but later chose to shut down. The plans for Indonesia was something Marilyn Monroe was involved with and Gianca admit to her murder, the murder of JFK and RFK and others because Monroe was about to talk.
- ➞ **Chauncey Marvin Holt:** He worked a layer or two under Sam Giancana. While Sam Giancana worked for William King Harvey, Myers Lansky worked under San Giancana. And under Myers Lansky was Chauncey Marin Holt the more field soldier in the operation than leader of the operations. Meyer Lansky as a Russian-born American organized crime figure associated with gambling operations and illicit finance in the United States, Cuba, and the Caribbean during the mid-20th century. Lansky met Benjamin "Bugsy" Siegel when they were children. They became lifelong friends, as well as partners in the bootlegging trade, and together managed the Bugs and Meyer Mob, and this would become Murder Inc. (as the press and LBJ called it), contract killing available to many including the CIA in contested countries such as Cuba.
- ➞ **Allen Dulles and John Foster Dulles and Charles Cabell:** This Pentagon figures were planners of military operations including getting factions built to fight against common enemies. When MK-Ulra planners would need surplus aircraft or other military hardware for on operation the someone like Holt would use it was Prouty who released the surplus hardware from Davis-Monthan airbase or wherever it was found in inventory.
